NEW LOAN SET-UP

HOME MORTGAGE LENDING SOLUTIONS

New Loan Set-Up and Review Services

Indecomm Global Services, Inc. provides support to the mortgage industry by offering an array of outsourcing solutions to enable its clients to find efficiencies in every area of the mortgage process. New loan set-up is one area that can be easily outsourced and quickly executed.

In our New Loan Set-Up department, our experienced staff of reviewers and data entry personnel will prepare loans for processing and/or underwriting. Services include:

- Stacking and indexing electronic loan documents.
- Preparing and sending initial mortgage disclosures.
- Ordering required verifications, appraisal reports, subordination agreements, etc.
- Validating and updating loan level data in the Loan Origination System (LOS).
- Reviewing loan files prior to underwriting to determine missing documents and data.

Indecomm's New Loan Set-Up solution offers the following benefits:

- Flexible and scalable workforce
- 24/7 operation
- Quick turnaround times
- Variable pricing

The services we offer are even more critical today in assisting our clients through the current challenges presented by the industry and economy to sustain profitable mortgage operations. We are committed to using our expertise to help our clients improve compliance, grow their production capabilities, and lower costs by utilizing our outsourcing capabilities.

MOBILITY

HOME

TECHNOLOGY

NEXT-GEN SERVICES

Overview

The invention of mobile devices has changed the way we live, especially with the advent of smart phones and tablets. Shopping, entertainment, news, healthcare, education, utilities, social networking, and even work-related functions have all gone mobile.

Trend

Mobility provides an efficient and easy way to reach more people than ever before. Penetration of handheld devices around the world have motivated enterprises to offer a growing variety of mobile solutions. The popularity of cloud-based and social media tools combined with mobility is engaging customers and employees alike, as well as increasing the reach and risk of IT.

As a result, the nature of interactions with customers has changed dramatically. Innovative technologies like HTML5 are closing the gap between various mobile operating systems, because apps developed in HTML5 can be used on any platform and any browser. With the emerging opportunities in the fields of mobile commerce, mobile payments, location-based services, social networking, and mobile video, enterprises are looking aggressively for new profit centers.

Offering

Indecomm Mobile R&D labs provides deep expertise for a variety of enterprise-wide mobile technologies and platforms, including Android, iOS, Blackberry, Windows Phone, J2ME and more.

Consulting

Our diverse knowledge of mobile technologies enables us to provide the latest technology solutions for you based on your choice of device(s) and platform(s). Let our team of mobility experts help you define and finalize your enterprise mobility strategy and presence, including the architecture, design, and development of next-gen consumer and enterprise-level applications.

Architecting

Indecomm Mobile Labs' diverse experience will help you define the optimal mobile architecture and apps for different mobile devices and browsers, HTML5 applications (which can resemble native web apps), streaming solutions, bandwidth / network detection, Imaging, optimizing, widgets, and many more options.
